Key project goals

IDENTIFY, STUDY AND SUPPORT

innovative energy communities that are seeking to provide European citizens with secure, clean and affordable electricity

ANALYZE AT LEAST 10 ENERGY COMMUNITIES IN SIX EUROPEAN UNION MEMBER STATES

in terms of their business models and potential for sustainable development

IDENTIFY STATUS QUO AND GIVE PRACTICAL RECOMMENDATIONS

how the European Union as well as national and regional governments can create favorable conditions for new clean energy communities

STIMULATE LEARNING PROCESSES

between stakeholders associated with energy communities

8 PARTNERS FROM 6 GEOGRAPHICALLY SPREAD EU MEMBER STATES

Sweden, UK, The Netherlands, Germany, Slovenia and Italy

Key project outcomes

- **T TYPOLOGY** of new clean energy communities
- **COMPARISON** of policy, regulatory, physical and social conditions for energy communities in 6 EU countries
- **ASSESSMENT** of community energy business models
- **MAPPING** of actors, their networks, knowledge and skills involved in »newcomers«
- **UNDERSTANDING** of energy community members' values, attitudes, perceptions and behaviour
- **CO-CREATION** of policy recommendations

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 8337752.

Project partners:

Univerza v Ljubljani
